

Wash & Fold 101

Folding

It's important to have consistent folding practices when offering wash and fold services at your store. Here are a few helpful training videos to get you started!

Packaging

You can package your completed order in many different ways but the key is to make sure that the items won't move around easily in transit or wrinkle. Here are some options for packaging your orders!

Organization & Storage

Organizing your storage space will help you run your store efficiently. You'll want to have a POS in place to manage all your wash and fold orders to mitigate any chance of error or mix ups. If you don't have a ton of space, there are plenty of creative ways to add storage solutions. While you don't necessarily have to organize your orders by rack or last name etc, it can help create a more efficient process for you and your staff.
